Funding the future

Help the next generation face the challenges of the maritime industry of tomorrow
In the fast moving and complex world in which we live it is becoming increasingly necessary that we, as professionals, should be able to consider new ideas. It is important for The Nautical Institute to take a lead in encouraging high standards of knowledge and competence among those who control sea going ships in the belief that exemplary professional conduct stands above regulations and will greatly add to the safety and efficiency of shipping.

Captain Sir George Barnard KB MNI
Founding President of The Nautical Institute 1971-75, speaking at the Institute’s first AGM in 1973
Sharing and learning

The Nautical Institute is a unique membership organisation that concentrates on improving practical seafaring in a rapidly changing maritime environment. Thanks to the support of people like you we provide professional and practical input to the work of the IMO; ensure members’ concerns are effectively addressed within the industry; promote a sustainable maritime profession and encourage human-centred design in technology at sea and in training. We work to promote continuing professional development (CPD) and mentoring.

The Institute’s mission is to support those involved in the control of seagoing ships. If we are to have a sustainable profession for the future it will be no coincidence; it will take effort, thoughtfulness and cooperation. The Institute is committed to playing its part in this sustainable future by being the leading professional body in this field.

We bring together maritime professionals from all over the world. Yet all of us have joined the NI with the common aim of sharing and learning.

This is our Institute and we will grow stronger and wiser together. The world is changing – more sensitivities, more regulations, more accountability, more technology, more trade, more ships, less water space and greater competition from other industries offering opportunities to bright young people. By continuing your commitment to a sustained maritime industry, you can help our seafarers of the future.

John Lloyd RD MBA FNI
CEO, The Nautical Institute
London
The future of
The Nautical Institute –
how you can help

Opportunity 1
Furthering a culture of diversity and opportunity

The Nautical Institute has always been proud of its rich international mix and boasts members from 120 countries with branches in 70 locations – and we want to do more, much more. We want to reach out to all ages, genders and cultures to benefit from the rich diversity that our industry is famous for – and continue to inspire professionalism on a global basis.

There is clear evidence that a wide range of cultures brings added value to both the onboard environment and international business. The Institute will identify and promote best practices so this diverse workforce can benefit from professional interaction in the future.

Supporting the NI in this area will help us:

• Create more branches so the Institute has a wider voice, to develop regional initiatives to encourage maritime awareness in the wider community and especially in the education system. We will promote careers and opportunities in maritime.

Opportunity 2

Enhancing and developing skills for the future

The world is changing rapidly and shipping is moving with it. The rate of change due to issues around regulations, ship design, cargoes, technology and crewing gains pace each year. Younger crew members will need to be equipped to work in this world. Our members are concerned about the speed of technological change. They want to prepare for the future.

We will identify how to hold onto the best of traditional seamanship skills while dealing with new technology and the challenges of the global seafaring community. The Institute currently has projects and work plans to address these issues but needs more resources to increase effectiveness. This will entail investment for research and collaboration with our members and other organisations to influence and test new ideas and systems.

Supporting the NI in this area will help us:

- Develop specific skills assessments for mariners controlling the next generation of seagoing vessels
- Identify the core skills our mariners will need over and above STCW
- Help us engage internationally with programmes and advice so every nation can improve the safety and effectiveness of its mariners.

Opportunity 3

Infrastructure

The Nautical Institute is a modern organisation and we need to make the best use of our resources to be even more effective. Our headquarters is in rented accommodation in London, near to the IMO. We use the most modern technology to interact with our members, branches and wider industry partners and invest (as budgets allow) to ensure our staff are as productive as possible. With our own premises we could be more effective financially and ensure that management concentrates on added value initiatives for the benefit of members and the maritime sector generally.

Supporting the NI in this area will help us:

- Invest in new technology to ensure we can give the most efficient service to our members.
- Remain in close proximity to the IMO so that we can continue to ensure members’ voices are heard
- Have security of tenure and create firm foundations for the next 50 years of the Institute and beyond.
Vision of our founding fathers

Nearly 50 years ago a group of Shipmasters met to address the issues of the day – mostly centred on huge technological change. Challenges included larger vessels, accidents, open registries and change to the structure of the shipping industry as traditional companies disappeared.

The group got together to set up an organisation to keep them up to date with developments and provide continuing professional development (CPD) for technical issues. They called it The Nautical Institute as there was no other organisation addressing these issues.

The aims were to enhance technical competencies and always be there to enhance the professional status of seafarers beyond the minimum set out in regulations.

They **Believed in our profession**

And **Believed in best practice**

And **You were a part of it**

Once again seafarers face a time of great change and challenges – and current members of The Nautical Institute are preparing for the future, and can achieve so much with your help.
Funding the future

You were there at the foundation of the Institute and grappled with the issues of your day. Now today's generation needs you to help fund the future so they can be equipped with the tools to do the job.

Some of the great changes and challenges faced by the next cohort of seafarers are:
- New sources of energy
- Ship designs
- Technology
- Employment.

The Nautical Institute will help them navigate through – with your help.

Future projects may include:
- Programme for onboard assessments in the use of technology
- Simulator studies of human factors
- Greater input to standards and designs based on user feedback
- CPD services based on evolving systems.

Pledging a legacy will cost you nothing today, but will be of immense value to the Institute in the years to come. Whatever you want to achieve – from supporting our drive to innovative best practice, to providing support for evolving competencies – a gift in your will is a way of continuing to make a difference to future generations.
Let’s get in touch...

We recognise that a gift or legacy to the NI is a personal decision and should be carefully considered. Anyone considering such a generous gift is encouraged to contact our CEO Capt John Lloyd directly to discuss options for donation and recognition, regardless of the amount.

☐ Yes I would like to discuss my gift or legacy with Captain Lloyd.

Name............................................................................................................................................................
Address ..........................................................................................................................................................
.............................................................................................................................................................................
.............................................................................................................................................................................
Telephone ....................................................................................................................................................

Or call Captain Lloyd on 020 7928 1351 or email john.lloyd@nautinst.org
My gift will be...

I wish to make a contribution through my will and wish it to be put towards (optional):

- [ ] Contributing to the general work of The Nautical Institute
- [ ] Opportunity 1: Furthering a culture of diversity and opportunity
- [ ] Opportunity 2: Enhancing and developing skills for the future
- [ ] Opportunity 3: Infrastructure

If you do decide to leave a gift, it’s essential to include our full name to make sure that your gift reaches us. Please follow the instructions on the Codicil form in this pack.
Codicil Form

Please keep this with (but not stapled to) your will.

If you have any questions about writing a codicil or updating your will, you should seek advice from a qualified professional, such as a solicitor.

This is my first/second/third* codicil to my last will (*delete as appropriate)

which is dated of ................... me (name).............................................

Address ......................................................................................................................
........................................................................................................................................
........................................................................................................................................
............................................................................ Postcode ......................................

01 I give to The Nautical Institute (Registered Charity No. 1002462) of 202 Lambeth Road, London, SE1 7LQ for its general charitable purposes.

to be applied to the general purposes of the said charity

02 In all other respects I confirm that my said Will and any existing codicils thereto.
